IN THE CLAIMS:

Please amend the claims as follows:

- 1. (currently amended) A drilling fluid additive comprising: talc, graphite, polymer copolymer beads and at least one carrier, said carrier is selected from a group consisting of oils, esters, glycols, cellulose, olefins and mixtures thereof.
- 2. (original) The drilling fluid additive of Claim 1 further comprising uintaite.
- 3. (original) The drilling fluid additive of Claim 1 wherein said carrier comprises polypropylene glycol.
- 4. (cancelled) The drilling fluid additive of Claim 1 wherein said carrier is selected from a group consisting of oils, esters, glycols, cellulose, olefins and mixtures thereof.
- 5. (previously presented) The drilling fluid additive of Claim 2 wherein said talc comprises from about 1% to about 20% of said additive, said graphite comprises from about 1% to about 30% of said additive, said carrier comprises from about 47% to about 90% of said additive, said beads comprises from about 2% to about 50% and said uintaite comprises from about 1% to about 40% of said additive.
- 6. (original) The drilling fluid additive of Claim 1 wherein said carrier is selected from a group consisting of polypropylene glycol, polyethoxylated glycol, polybutylene

glycol, polyethylene glycol, propylene glycol, polyester polyol-poly(oxyethylene-oxy) propylene glycol, polyoxyalkylene glycol ethers and mixtures thereof.

- 7. (currently amended) The drilling fluid additive of Claim 2 1 wherein said uintiate is treated with a second carrier.
- 8. (original) The drilling fluid additive of Claim 7 wherein said second carrier is selected from a group consisting of oils, esters, glycols, cellulose, olefins and mixtures thereof.
- 9. (currently amended) The drilling fluid additive of Claim 7 1 wherein said second carrier comprises an ethoxylated glycol.
- 10. (currently amended) A drilling fluid additive manufactured by a method comprising: admixing talc, graphite, polymer copolymer beads and at least one carrier, said carrier is selected from a group consisting of oils, esters, glycols, cellulose, olefins and mixtures thereof.
- 11. (currently amended) The drilling fluid additive of Claim 10 wherein said carrier is first admixed with said talc and then the graphite and polymer copolymer beads are admixed.

- 12. (original) The drilling fluid additive of Claim 10 further comprising admixing an uintaite with said carrier, talc and graphite mixture.
- 13. (cancelled) The drilling fluid additive of Claim 10 wherein said carrier is selected from a group consisting of oils, esters, glycols, cellulose, olefins and mixtures thereof.
- 14. (original) The drilling fluid additive of Claim 12 wherein said uintaite is pretreated with a second carrier prior to being admixed to said carrier, talc and graphite mixture.
- 15. (previously presented) The drilling fluid additive of Claim 12 wherein said talc comprises from about 1% to about 20% of said additive, said graphite comprises from about 1% to about 30% of said additive, said carrier comprises from about 47% to about 90% of said additive, said beads comprises from about 2% to about 50% and said uintaite comprises from about 1% to about 40% of said additive.
- 16. (currently amended) The drilling fluid additive of Claim 10 14 wherein said second carrier is selected from a group consisting of oils, esters, glycols, cellulose, olefins and mixtures thereof.
- 17. (currently amended) A method of manufacturing a drilling fluid additive, said method comprising:

admixing talc with at least one carrier, said carrier is selected from a group consisting of oils, esters, glycols, cellulose, olefins and mixtures thereof;

admixing graphite to said talc and carrier mixture; and admixing polymer copolymer beads to said talc, graphite and carrier mixture.

- 18. (currently amended) The method of Claim 17 further comprising admixing an uintaite with said talc, carrier, polymer copolymer beads and graphite mixture.
- 19. (currently amended) The method of Claim 18 wherein said uintaite is pretreated with a second carrier prior to admixing said uintaite to said talc, carrier, polymer copolymer beads and graphite mixture.
- 20. (previously presented) The method of Claim 19 wherein said second carriers are selected from a group consisting of oils, esters, glycols, cellulose, olefins and mixtures thereof.
